Response from: Matthew C. Holmes and Cynthia Zawadski Holmes

We live on Towle Hill Lane and have owned the property since 2004, coincidentally.

We fully approve of the overall EPA plan produced to clean-up the toxic waste site(s).

Unlike some other local area residents, we fully acknowledge the necessity, both in the short-term and long-term, for the clean-up—while realizing we will be directly impacted on a nearly daily basis.

We do, however, think that Alternative 2 is preferable for such a beautiful rural part of Vermont.

From both an ecological and aesthetic perspective, our preference would be for an off-site storage in an existing landfill specifically suited to house the toxic debris.

Thank you for considering our point of view.

Sincerely,
Matthew and Cynthia
